

Dr. Robert W. Corell is Vice President of Programs and Policy at The H. John Heinz III Center for Science, Economics, and the Environment (on leave for 2009), a Senior Policy Fellow at the Policy Program of the American Meteorological Society, and Senior Science Advisor to both the Global Environment and Technology Foundation and the Climate Science Institute. He currently chairs and leads the international Climate Action Initiative (CAI), the overall goal of which is to strengthening scientific foundations for and the policy negotiating frameworks of the UNFCCC, central to which is the use of policy exercises that employs real-time climate simulations. He is the lead P.I. for the U.S. contributions to the Global Energy Assessment. Corell chaired the Panel on Strategies and Methods for Climate-Related Decision Support, Committee on the Human Dimensions of Global Change, National Research Council of the National Academy of Sciences, which released its report *Informing Decisions in the Changing Climate* in 2009. Corell was the chair of the Arctic Climate Impact Assessment. In 2005, he completed an appointment as a Senior Research Fellow at the Belfer Center for Science and International Affairs of the Kennedy School for Government at Harvard University. Dr. Corell was one of those noted in the Nobel Peace Prize Award in 2007 for his extensive work with the IPCC assessments. Dr. Corell is actively engaged in research concerned with both the sciences of climate and global change and with the interface between science and public policy, particularly research activities that are focused on global and regional climate change and related environmental issues. Prior to January 2000, he was the Assistant Director for Geosciences at the National Science Foundation where he had responsibilities for the Atmospheric, Earth, and Ocean Sciences, the NSF's Polar Programs, and the NSF Global Change Program. While at NSF, Dr. Corell also served as the Chair of the President's National Science and Technology Council's Committee that has oversight of the U.S. Global Change Research Program and he also chaired an international committee of government agencies (~25) funding global change research for many years. Further, he served as chair and principal U.S. delegate to many international bodies with interest in and responsibilities for climate and global change research programs. Prior to joining the NSF in 1987, he was a Professor and academic administrator at the University of New Hampshire. Dr. Corell is an oceanographer and engineer by background and training, having received Ph.D., M.S. and B.S. degrees at Case Western Reserve University and MIT. He has also held academic appointments at the Woods Hole Institution of Oceanography, the Scripps Institution of Oceanography, the University of Washington, and Case Western Reserve University.
